

CHRISAL

INSTRUCTIONS – HOW TO USE CHRISAL'S PIP "ALLERGY FREE" - PROBIOTIC HEALTHCARE SPRAY FOR PETS & PET AREAS

WELCOME TO THE WORLD OF CHRISAL PIP – GREEN PROBIOTIC POWER..!

- **FOR THE FIRST WEEK:** Chrisal PIP (Probiotics-In-Progress) products are incredibly safe and easy to use. Simply give the can a shake before using and then just spray enough to mist your pet for two or three seconds on the top and then the same again on the bottom. *That is all it takes, though larger animals can take longer.*
- Normally hold the can from one to three feet away (and closer for trouble spots). Start from longer distances until your pet gets used to the spray and you will find in many cases, your pet will enjoy the experience and love being petted and played with while spraying – and knows where their relief comes from.
- **FOR THE FIRST WEEK**, spray your pets, their bedding and food areas at least once a day. It is also a very good idea to spray all pet's paws after going outside (and before leaving home for additional protection).
- **AFTER THE FIRST WEEK** you only have to spray pet areas once every three (3) days..! But, not less than that! However, you can spray your pets every day for optimal protection to keep them clean and smelling good since they are always rubbing things – and also daily for Problem Areas and especially cat litter for your protection from the unseen contaminants on cat's paws carried around the house..!

PET FOOD AREAS, BEDS, FURNITURE, CARPETS, PET TOYS & OTHER AREAS your pet normally likes to use should get a spray at least once every three days as well – and you will be amazed at how well pet odors and stains will vanish with Chrisal PIP. If you clean trouble spots with our Chrisal PIP Cleaners and then spray the area with the PIP spray, even a Blood Hound will not be able to find the problem area anymore..!

Remember:

- Shake PIP & hold the can from one to three feet away
- No need to overspray – just spray a few seconds at a time
- After the first week, to maintain an allergy free environment just spray areas at least every 3 days and pets daily (or more if you wish)...
