

HORSES & CHRISAL - NOTES ON EQUINE CHRISAL USE

The following are some of the reports and thank you letters from users of Chrisal PIP for horses. Also see the studies, information and other reports on the millions of animals, poultry and fish that have benefited from Chrisal use. It is incredibly rewarding for all of us at Chrisal to see how much help we are to our pets and animal friends. In addition to our personal viewpoints, an important factor for breeders & farmers is that "Healthy animals are happier and do better overall", providing owners with far more use from their animals as well as major savings in costs.

EQUINE REPORT: HORSE: SATIN – EYE INFECTION (UTAH RANCH)

From: Craig Perry [mailto:attorneycraigperry@gmail.com] **Sent:** Saturday, July 17, 2010 9:52 AM
To: lino@linomail.com **Subject:** Satin's Eye Infection

These photos are after the proper application, only two days later!!! Amazing results. Craig

Subject: Fwd: Another testimonial
Dear Lino,
This is another incredible story about Chrisal. As you know, Craig is an attorney and said it was fine for you to use the below testimonial he just sent me. You have his permission to include his name. Regards, Dr. Dave

----- Forwarded message -----

On Thursday last week, our most valuable horse, and arguably the best Curly Missouri Foxtrotter in the world, gave birth to a special palomino filly.

We were overjoyed. A few hours later, my wife noticed that this little filly had two eye infections! We think the infections came from the belly of her mother, who was shedding profusely in the warming spring air and the hair, with its dander, got in the filly's

eyes.

So I told Lisa, why not try the Water Plus. She had confidence in the product as we have seen many miracles with this product already (it has become our "Liquid" BandAid to fix all kinds of problems). She mixed a diluted solution with a human saline solution and rinsed out the filly's eyes.

We have had many eye infections on the little ranch; the normal course of care is antibiotics for several days, at least a week. It is expensive to boot. Then of course we have to give them antibiotics afterwards.

Almost immediately one of the eyes cleared up. The other eye, however, was particularly nasty. My wife said, "If this works on the other eye, I will be singing praises about this product!" In the interim her Dad had called, being his cynical self, and started to make her feel she should not be so sure about this product.

The proof is in the pudding. In less than 24 hours, the (Chrisal Water Plus labeled as) ProBioPlus had completely ELIMINATED the eye infection! It saved our special new filly from pain and discomfort, and preserved her immune system at a vulnerable time (one day post delivery!). No expensive antibiotics, time consuming procedures (ever tried to give a shot to a foal? They hate you for weeks, breaks down the training time to make them comfortable around humans).

My wife is still in joyful shock at the results. We know it is absolutely from this miracle liquid because we have dealt with this many times before. My wife is singin' praises!

Craig Perry, Esq.

Team, we just received photos today of the foal, which is a filly named Sahara.

It is easy to see why she was so named and it brings a smile to our faces to know we were able to help such a precious animal with Chrisal.

As soon as we have time, we will make a gallery of all the photos people send us of all the animals we have helped with Chrisal PIP.

You need to come over some time for a horse ride. Here is the link to my wife's horse ranch. [zions gait curlies](#) All of our horses are going to benefit from this product (Chrisal), I am convinced of that.

My God what a lovely filly and easy to see why so named. Thank you so much for the photo, it makes us feel wonderful that we were able to help.

Best regards, Lino

My wife is already a Chrisal convert when she saw the results with the eyes. I use the products several times a day. Trying the shower gel the past three days. It knocks out under-arm body odor, amazing. I use the spray on my pillows. I have not been able to breathe through my nose at night, or through both nostrils, ever, although the Neti pot helps but it's laborious, and Afrin--what a nightmare that stuff is. But now, it's much easier. My nose is always clear and the amount of mucous my nose generates is very low.

I've had a cough the past month, it is clearing up now. The Chrisal really helps with that, too. Looking forward to more great results. Craig

THE NEW JERSEY EQUINE CLINIC

With "A Tradition of Excellence" The New Jersey Equine Clinic is a state-of-the-art equine medical and surgical center well known and referred to for providing the highest quality of medical and surgical services to the equine industry. The NJ Equine Clinic has been testing and using Chrisal PIP products with great success. Located on 130 acres in the rolling pasture in western Monmouth County, the New Jersey Equine Clinic, with a staff of some 24 doctors and care specialist offers supervised post-operative

care as well and has been serving a discriminating clientele for 32 years.

Chrisal is honored that The New Jersey Equine Clinic, which is known for their caring, professional and ethical manner, has chosen to first test and now use Chrisal PIP in their work to provide the highest quality veterinary service to the equine industry in a within a mutually supportive work environment.

In a report from the people working with the equine clinic on their use of Chrisal the comment was: ***"I have to say that the staff at the NJ Equine Clinic loves how well PIP works and sings PIP praises all day long!"***

PHOTOS BELOW OF RESULTS USE:

These big, heavy mats at the Equine Clinic collect a great deal of odor and moisture and therefore an ideal breeding ground for bacterial growth and mold. You can see how well Chrisal PIP is cutting through all the build-up.

Before Chrisal PIP

After Starting Chrisal PIP

**It can be seen how in short order, Chrisal is starting to eat through all the biofilm buildup*

FERDY - PHOTO OF THE HORSE CLINIC WEST OF BRUSSELS

TO PROVE THE DIFFERENCE BETWEEN CHRISAL AND OTHER PRODUCTS, IN THIS TEST - HALF THE TREATMENT FLOOR AREA WAS CLEANED WITH THE HORSE CLINIC'S STANDARD VETERINARIAN "BIOCIDAL" CLEANING PRODUCTS (LEFT SIDE) - AND ON THE OTHER HALF (RIGHT SIDE) CHRISAL'S PIP PROBIOTIC FLOOR CLEANER WAS USED.

As can be seen, the difference in cleaning with Chrisal PIP is easily seen and culture samples of the floor proves that Chrisal PIP products provide days on ongoing protection where all regular cleaning and disinfectant products stop protecting the moment they are dry.

Note that in Germany, where Chrisal PIP Horse Products are sold under a private label, the product is doing extremely very well in shops there. Team, we will try to copy over all the information on Chrisal use for horses to this file as soon as possible - but also note the huge amount of data from hundreds of farms using Chrisal with perfect results for all types of animals from dairy cows to poultry and pigs - as well as major use in fish farms, including for extremely expensive prize winning Koi Fish. It should also be of major interest that use of Chrisal in hospitals have resulted in reducing infections by up to 90%.
