

HOW TO USE CHRISAL'S PIP PROBIOTIC BIOMIST (BIOTIC MIST) PROBIOTIC ENVIRONMENTAL CONTROL

WELCOME TO THE WORLD OF CHRISAL PIP – GREEN PROBIOTIC POWER..!

INSTRUCTIONS: FIRST, ALWAYS SHAKE THE CONCENTRATED PRODUCT WELL BEFORE DILUTING..!

NOTE - CHRISAL PIP (Probiotics-In-Progress) PRODUCTS ARE INCREDIBLY POWERFUL... SO YOU DON'T HAVE TO USE EXTRA – SPECIFICALLY FOR THE CLEANERS..! So, Save Your Products & Your Money. However, for our Probiotic BioMist, you can use more if you have a higher degree of contamination or it is the first few times. Follow instructions and Chrisal will provide a great environmental control, cleaning experience & increased protection.

Economical to use, for normally soiled areas, PIP BIOMIST can be diluted with between 30 to 50 parts lukewarm water for each part PIP BIOMIST - then fog or spray the areas to be treated with the diluted mixture once every three days for optimal affect. For light cleaning need areas, a 100 to 1 dilution will work.

For extremely and very heavily contaminated areas with high a degree of problems to be controlled – like an animal or poultry barn - then dilute PIP BIOMIST less, 1 part PIP BIOMIST to 2 parts water and fog or spray treat the problem areas daily or at least once every three days with the dilution until stabilized. Thereafter, once every 3 days is perfect.

Note: After dilution the diluted mixture must be used within five days, and should be discarded (pour down drains to help keep your pipes healthier).

FOR DUST MITE AND OTHER ALLERGENS, just follow the same instructions as for the PIP ALLERGY FREE products. You should notice a significant difference in just a few days.

FOR AIR CONDITIONING SYSTEMS:

(1) Turn off the A/C and fog direction into all your vents. (2) Then take out the filter and turn the fan on the A/C unit without the cooling or heat (Note you can also fog with the A/C on cool if needed, but not on heat) – (3) and fog into the air return opening for 3 to 5 minutes at least once a month when changing your filter. HOWEVER, for people with asthma and other respiratory problems, or in warm areas, fog your A/C at least once a week – or more. Ideally, every three days for all applications will give you optimum results and far healthier air.

NOTE: The concentrate has a shelf life of at least two years. Please keep at room temperature and out of direct sunlight, do not exceed 122^oF or freeze. Always shake before mixing.

REMEMBER THAT CHRISAL IS MADE TO BE VERY ECONOMICAL, SO MEASURE WITH CARE AS A LITTLE GOES A LONG WAY...!
