

HOW TO USE CHRISAL'S STABIOTIC™ MIST PROBIOTIC ENVIRONMENTAL CONTROL (PEC)

WELCOME TO THE WORLD OF CHRISAL PIP – GREEN PROBIOTIC POWER..!

INSTRUCTIONS: FIRST, ALWAYS SHAKE THE CONCENTRATED PRODUCT WELL BEFORE DILUTING..!

Note Chrisal Probiotic Products Are Incredibly Powerful and you can adjust the amount required for the degree of contamination to control Follow instructions and Chrisal will provide a great environmental control, cleaning experience & increased protection.

Economical to use, for light and normally soiled areas, dilute by using two (2) ounces of Chrisal PEC concentrate with each gallon of lukewarm water. Then fog or spray the areas to be treated with the diluted mixture once every three days for optimal affect.

For problem areas use six (6) to 12 ounces of concentrate for each gallon of water – and for a high degree of problems to be controlled – like an animal or poultry barn - then use one (1) part Chrisal PEC to two (2) parts water and fog or spray treat the problem areas daily or at least once every three days with the dilution until stabilized.

Note: After dilution the diluted mixture must be used within five days, and should be discarded (pour down drains to help keep your pipes healthier).

FOR DUST MITE AND OTHER ALLERGENS, just follow the same instructions as for the PIP ALLERGY FREE products. You should notice a significant difference in just a few days.

FOR AIR CONDITIONING SYSTEMS:

(1) Turn off the A/C and fog direction into all your vents. (2) Then take out the filter and turn the fan on the A/C unit without the cooling or heat (Note you can also fog with the A/C on cool if needed, but not on heat) – (3) then fog into the air return opening for 3 to 5 minutes at least weekly and when changing filters. HOWEVER, for people with asthma and other respiratory problems, or in warm areas, fog your A/C up to 3 times a week to give you optimum results and far healthier air.

NOTE: The concentrate has a shelf life of at least two years. Please keep at room temperature and out of direct sunlight, do not exceed 122°F or freeze. Always shake before mixing.
